Summary

Computer Science & Engineering student specializing in **AI/ML** and **Full-Stack Development**, with professional experience building conversational AI backends as a Software Engineering Intern at UnifyList. Delivered **end-to-end systems** including a multi-tenant SaaS backend and a Gemini-powered code query engine that **reduced comprehension time**. Proficient in the MERN stack, PostgreSQL, GraphQL, and LLM integrations, with a strong focus on system performance, reliability, and scalable software design.

Education

Brainware University

B.Tech in Computer Science & Engineering (AI & ML)

CGPA: **8.62/10.0** | Relevant: DSA, OOP, Web Development

Kolkata

Aug 2023 – Jul 2027

Experience

UnifyList

Software Engineering Intern

Kolkata, India

Apr 2026 – Present

- Engineered a session-based conversational AI backend leveraging **OpenAI GPT-4o-mini** to guide users through automated application schema generation.
- Designed real-time streaming pipelines using **Server-Sent Events (SSE)** to push live compilation percentages and state progress logs to the frontend client.
- Developed a self-healing schema validator enforcing critical design constraints, auto-converting plain ID fields to lookup relationships (**dataModel**), and guaranteeing minimum form field limits.
- Integrated platform APIs via **GraphQL (Apollo/Axios)** with custom exponential backoff retry logic to reliably execute database migrations and seed sample records.

Technical Skills

- Languages:** JavaScript (ES6+), C, C++, HTML5, CSS3
- Web & Frameworks:** React.js, Node.js, Express.js, MongoDB, PostgreSQL, RESTful APIs
- Tools:** Git/GitHub, VS Code, Postman, Netlify

Projects

AI Code Query & Explainer Tool

Oct – Nov 2025

- Engineered platform parsing multi-language code with Gemini API, **reducing comprehension time by 60%**.
- Built React.js frontend with Node.js backend handling **100+ requests/min**.
- Technologies:** React.js, Node.js, Express.js, MongoDB, Gemini API

Multi-Tenant SaaS Ticketing Engine

Nov – Dec 2025

- Built robust multi-tenant SaaS backend with organization-level data isolation and JWT authentication.
- Implemented role-based access control, ticket tracking with history, and threaded messaging system.
- Technologies:** Node.js, Express.js, PostgreSQL, JWT

Railway Reservation System

Jan – Feb 2026

- Engineered a high-concurrency booking engine handling **concurrent seat allocations** with transactional integrity.
- Optimized database queries to reduce search latency by **35%**, ensuring real-time availability updates.
- Technologies:** Node.js, Express.js, PostgreSQL, JWT

Achievements & Certifications

- MSME Project Shortlist** – Ministry of MSME, Govt. of India (Aug 2025): Shortlisted for AI-Powered Drone Logistics for Coastal & Hilly Regions under innovation and entrepreneurship support program
- Samsung Innovation Campus Participant** (Sep-Nov 2025): Completed intensive ML/DS training, developed Heart Disease Prediction System as capstone achieving 92% accuracy
- Adobe India Hackathon Participant** (Jun 2025): Advanced through competitive algorithmic assessment rounds (MCQ & Coding Challenges)
- Smart India Hackathon Participant** (Sep 2025): Developed AI-powered sports talent assessment platform proposal for national-level competition
